

Questions to Ask Your Retina Specialist

When you have a retinal condition like Wet Age-Related Macular Degeneration, Diabetic Macular Edema, Diabetic Retinopathy, or Macular Edema following Retinal Vein Occlusion, it can be helpful to make the most of your appointments by being prepared with a list of questions to ask your retina specialist. Download and print this list to take with you.

While you're waiting for your next appointment, you can also read through our Frequently Asked Questions (FAQ); please see QR code below.

Questions about your eye condition

- What do my symptoms mean?
- How can my condition affect my vision?
- What can I do about my condition?
- Do you have any resources or tips to help me manage my condition?

Questions about EYLEA HD

- What is EYLEA HD?
- What is the difference between EYLEA[®] (aflibercept) Injection and EYLEA HD?
- What are the potential benefits of EYLEA HD treatment?
- What are the potential side effects of EYLEA HD treatment?
- How can I tell if EYLEA HD is working for me, and how fast does it work?
- How is EYLEA HD given?
- How often will I need to receive treatment?
- What if I have to miss an eye care appointment or a scheduled injection?
- How long do I have to wait after treatment to resume normal activities like driving?

For more information about support

- How much does EYLEA HD cost, and is there financial assistance to help?
- Will my insurance cover the cost of EYLEA HD?

Talk to your retina specialist to determine if EYLEA HD is right for you.

IMPORTANT SAFETY INFORMATION

- EYLEA HD and EYLEA are administered by injection into the eye. You should not use EYLEA HD or EYLEA if you have an infection in or around the eye, eye pain or redness, or known allergies to any of the ingredients in EYLEA HD or EYLEA, including aflibercept.

Please see additional Important Safety Information on the next page and click here for full Prescribing Information for EYLEA HD and EYLEA.

IMPORTANT SAFETY INFORMATION

- EYLEA HD and EYLEA[®] (aflibercept) Injection are administered by injection into the eye. You should not use EYLEA HD or EYLEA if you have an infection in or around the eye, eye pain or redness, or known allergies to any of the ingredients in EYLEA HD or EYLEA, including aflibercept.
- Injections into the eye with EYLEA HD or EYLEA can result in an infection in the eye, retinal detachment (separation of retina from back of the eye) and, more rarely, serious inflammation of blood vessels in the retina that may include blockage. Call your doctor right away if you experience eye pain or redness, light sensitivity, or a change in vision after an injection.
- In some patients, injections with EYLEA HD or EYLEA may cause a temporary increase in eye pressure within 1 hour of the injection. Sustained increases in eye pressure have been reported with repeated injections, and your doctor may monitor this after each injection.
- There is a potential but rare risk of serious and sometimes fatal side effects, related to blood clots, leading to heart attack or stroke in patients receiving EYLEA HD or EYLEA.
- The most common side effects reported in patients receiving EYLEA HD were cataract, increased redness in the eye, injury to the outer layer of the eye, increased pressure in the eye, eye discomfort, pain, or irritation, bleeding in the back of the eye, blurred vision, vitreous (gel-like substance) detachment, and vitreous floaters.
- The most common side effects reported in patients receiving EYLEA were increased redness in the eye, eye pain, cataract, vitreous detachment, vitreous floaters, moving spots in the field of vision, and increased pressure in the eye.
- You may experience temporary visual changes after an EYLEA HD or EYLEA injection and associated eye exams; do not drive or use machinery until your vision recovers sufficiently.
- These are not all the possible side effects of EYLEA HD or EYLEA. Call your doctor for medical advice about side effects. You may report side effects to the FDA at 1-800-FDA-1088.

INDICATIONS

EYLEA HD[®] (aflibercept) Injection 8 mg and EYLEA[®] (aflibercept) Injection 2 mg are prescription medicines approved for the treatment of patients with Wet Age-Related Macular Degeneration (AMD), Diabetic Macular Edema (DME), Diabetic Retinopathy (DR), and Macular Edema following Retinal Vein Occlusion (RVO).
